One Day Workshop
Electrochemical Characterization Techniques
on
13-02-2025

As part of the Scientific Social Responsibility (SSR) activity of the SERB project titled " Synthesis and characterization of Nickel and Manganese based nanoelectrodes for high performance self-charging supercapacitors". PI from the Department of Physics, University of Jammu, Jammu is organizing a one-day workshop on " Electrochemical Characterization Techniques ".

Applications are invited from researchers working in allied area to participate in this workshop. A maximum of 10 (ten) candidates (preferably research scholars) will be selected by the Principal Investigator and Head of the Department to participate in the program. Certificates will be issued to all the participants and complimentary lunch will also be provided.

Interested candidates are requested to fill the google form on or before 12-02-2025.
